# REDUCE RISK AND TURN A COST CENTER INTO A REVENUE GENERATOR

SIMPLIFY ACCOUNTS PAYABLE AND EARN REVENUE WITH FINEXIO VIRTUAL CARDS

WHY FINEXIO VIRTUAL CARDS?

- Cost-efficient and 100% digital — avoid paying for checks and postage while generating revenue
- Eliminates the manual processes associated with paper checks
- Highly secure and reduces the risk of fraud with 24/7 monitoring
- Fast payment processing with same-day payments available
- Improves supplier satisfaction with faster payment settlement, with complementary access to the Supplier Portal for visibility into payment status
- Convenient for suppliers — payments are directly deposited into their account

Finexio

HOW IT WORKS

With Finexio Virtual Cards, your vendors receive a one-time use card-by-email that contains a 16-digit randomly generated card number.

Payment recipients can simply enter the card information into their POS system to process the payment. In most instances, suppliers can access funds that same day.

GENERATE NEW REVENUE WITH FINEXIO VIRTUAL CARDS

In addition to eliminating the costs associated with printing, signing, and mailing paper checks, Fixexio Virtual Cards can offset costs of service. With Finexio Virtual Cards, a percentage of the supplier's payment is discounted that delivers revenue back to your business.

HIGHLY SECURE AND REDUCES RISK FOR YOU AND YOUR SUPPLIERS

Checks are 7x more likely to be involved in fraud than electronic payments and Finexio Virtual Cards are one of the most secure payment options. No bank account information is required for virtual card set up or payment transmission and each card is locked into a specific payment amount for a limited time.

ABOUT FINEXIO

Finexio is the leading AP Payments as a Service (PaaS) company focused on enabling end-to-end business payment capabilities in mid-market and enterprise organizations. This fully managed AP Payments as a Service solution represents a powerful disruption to traditional, disjointed manual-based AP processes. Finexio's modern, efficient service model, robust API, SSO capabilities, and differentiated service capabilities allows companies to eliminate manual processes, lower payment costs, and prevent payments fraud.
