Get paid faster with FinexioOnDemand

The simple way to free up cash

Cash is the lifeblood of every business

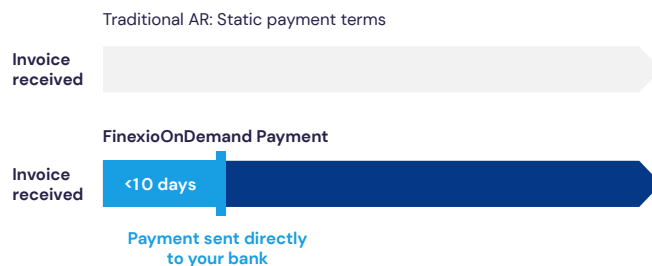

More competition and rapidly evolving market forces demand that you have the cash you need to fund today's operations and invest in transforming your business so it can survive—and thrive—into the future. But how do you free up that much-needed cash?

It's time to rethink payments

While most companies have lengthy (and getting longer) and inflexible payment terms, credit is tight, and more debt increases gearing. And factoring is expensive and limits your options. Finally, there's an answer—FinexioOnDemand—a new way of thinking about payments that makes it possible for you to get paid, on demand, for the goods and services you provide.

What if your customers paid you sooner?

FinexioOnDemand helps companies throughout the supply-chain eliminate the typical tensions between suppliers and customers that extended payment terms cause. Now, waiting 30, 60, or even 90 days to get your invoices paid is a thing of the past.

Get paid faster

You can get paid quickly, once your invoice is approved, weeks, even months ahead of typical payment terms. And payment is made directly into your bank account. That means you can say goodbye to paper checks and open the door to having more of the cash you need to succeed at your fingertips.
