Service and technology combine to enable AP teams to effortlessly leverage **modern, safe and secure, revenue-generating** electronic payments

What is AP Payments as a Service for Manufacturing?

Manufacturing companies use Finexio's AP Payments as a Service as a solution to eliminate check-runs, and increase electronic payment conversion, and manage supplier exception handling. Finexio streamlines the accounts payable process for you by being a direct extension of your workforce.

Fully Managed Payment Delivery & Operations

You focus on "who" to pay, we determine "how" - Finexio delivers 100% of your supplier payments

Dynamic Payment Reporting & Analytics

Gain unmatched visibility and control of your payment data in one centralized location for reporting

Supplier Management Powered by AI

Finexio leverages proprietary AI models to predict, and optimize electronic payment acceptance

Payment Fraud Prevention & Security

Finexio has fraud prevention, detection, and recovery tools and protocols in place to protect customer payments against bad actors and other fraudulent activities

Finexio Delivers Significant Value to Finance Teams in Manufacturing

B2B Payments are changing, and the shift to electronic payment methods allows manufacturers to overhaul legacy payment processes.

Reduce Costs

By eliminating manual work, paper checks, and preventing errors so suppliers can be paid quickly and efficiently

Save Time

By removing administrative payment tasks and supplier management, so your finance teams can focus on more value-add activities

Gain Visibility & Control

By providing insights into reconciliation, reporting, and visibility into supplier payments

Prevent Fraud

By reducing payment management liability and removing security burdens caused by check fraud or poor visibility of payment audit trails

Most Manufacturing businesses we work with say the reasons they choose Finexio is **cost reduction, time savings, and greater efficiency** amongst their financial teams.

“**57.9%**

of Manufacturing CFOs cite the reason for digitization of AP workflows is to automate manual processes.”

– AR/AP Digitization and Push to Enhance Customer Value, PYMNTS.com

Strategic Benefits for Manufacturing

1. Solve for beyond-human-scale payment data issues, and reallocate internal resource time away from manual processes
2. Ensure every payment is protected against payment fraud without investing in a new complex and costly process
3. Paper-free from day 1 – Immediately take advantage of modern electronic payments without a lengthy change-management process
4. Optimize your payments mix and adapt to changes in supplier preferences for long-term success for both you and your suppliers
5. Unmatched visibility and control over your payments data that you never had access to before to make better strategic financial decisions at your business

How it works

1

Payments Approved

Manufacturer tells Finexio who, when and how much to pay

2

Payment Oversight

Finexio meticulously examines each transaction to uncover potential risks and anomalies, implementing sophisticated fraud prevention screening powered by AI before proceeding with processing

3

Payments Processed

Finexio matches manufacturer to aggregated network supplier data

4

Payments Disbursed

Finexio identifies and delivers the best way to make a payment to the manufacturer's suppliers

5

Payments Settled

Finexio transmits remittance advice to the manufacturer's suppliers

“SFP and Finexio make it possible to get time back in your day, and money in your pocket.”

–John Kates,
CEO of Gallagher Fluid Seals, Inc.
